

Institute of Industrial Economics Profile

The Institute of Industrial Economics, founded in 2009, is an independent research institution to Jiangxi University of Finance and Economics(JUFE). The institution is entitled to issue Doctoral degree and Master degree in Industrial Economics, and it has the first post-doctoral mobile research station of applied economics in Jiangxi. In addition to this, its Industrial Economics is ranked as a national key discipline by the Ministry of Education.

The structure of the research team features reasonably in age, knowledge, title and education background. The institution, with scientific research at its core, has three research fields, namely industry innovation and strategic business startups, industry organizations and structures and industry regulations and competitions. Since 2009, the Institute of Industrial Economics has undertaken over 30 projects from National Science Foundation of China(NSFC) and the National Social Science Fund of China. What's more, it has published more than 300 essays in core journals.

The institution watches the Industry Economics frontier closely. Additionally, it dedicates to escalating the talents cultivation to a higher level by upgrading curriculum structure and employing renowned scholars from home and abroad to lecture graduates. Its is all these efforts enabled our graduates to pursue their doctor's degree in prestigious universities within China and overseas. Since its inception, over 300 senior managers in industry economics have entered the society from the institution and they obtained recognition from large companies, financial institutions and government agencies.

The institution promotes academic exchanges in China and beyond and it is evidenced by its building cooperation relations with major academic groups and agencies specialized in Industrial Economics. In June, 2014, the institution held the "international symposium on mechanism design and industrial organization", two Nobel Economic Prize laureates, Professor Eric Maskin from Harvard University and Jean Tirole from University of Toulouse, were invited to address the audience, which arose strong reverberation among economic frontier within China.
